Supervised by:
Dr. Omer Beg

NATIONAL UNIVERSITY OF COMPUTER & EMERGING SCIENCES

An in-depth study of unwanted energy consumption through detection of unintended personally identifiable information packets.

Data Packet

VPN

Virtual Private Network

Machine Learning Models

Smart Phone

Personally Identifies Information

Servers

Energy Footprint

- Literature Review.
- Dataset Collection and Generation.

Iteration 2
Visualization of our findings.

Iteration 4
Building UI for our system.

SEP · OCT · NOV · DEC · JAN · FEB · MAR · APR

Iteration 1
Ensemble Method to identifty PII.

Iteration 3
Model to Predict Energy of packets.

- Deployment
- Research Paper
